

NIDHI DATTAPRASAD SHASTRI

(617) 318-7417 | dattaprasadshastri.n@northeastern.edu | LinkedIn

EDUCATION

Northeastern University

MS, Software System Engineering

Expected May 2027

Boston, MA

- Relevant Coursework: AI Agent Infrastructure, Network Structures and Cloud Computing, Object Oriented Design.

RNS Institute of Technology

Bachelor of Engineering, Computer Science

Aug 2022

Bengaluru, India

- Relevant Coursework: Data structures and applications, Object oriented concepts, Computer networks and security.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, TypeScript, HTML, CSS, SQL

Databases: MySQL, PostgreSQL, exposure to NoSQL, Qdrant, Neo4J

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, Container Orchestration, GitHub Actions, Jenkins, CI/CD pipelines, Terraform, RDS, S3, EC2, Git, Linux, Route53, VPC, RBAC for secrets management

Data & Messaging: Apache Kafka, data pipeline monitoring, data-flow tracking, Datadog (dashboards, alerting), telemetry and performance metrics

Tools & Frameworks: Jira, Swagger, Hashicorp Vault, Akka Cluster, Hashicorp Packer, React, Node.js, JSON, APIs, Microservices, OOP

EXPERIENCE

Capgemini Technology Services - Client Mercedes Research and Development

Dec 2022 - Aug 2025

Analyst

Dec 2022 - Jan 2024 | Bengaluru, India

- Engineered and monitored data pipelines processing large-scale Mercedes enterprise datasets across MySQL and PostgreSQL, tracking data flow and integrity across ingestion and processing stages.
- Engineered real-time observability into data pipeline health using Datadog dashboards and alerts, improving data-flow visibility and accelerating issue detection across high-volume datasets.
- Integrated Apache Kafka into Java backend services to stream and process data between systems, supporting reliable, event-driven data flow across large Mercedes datasets.
- Engineered and maintained CI/CD pipelines for Java applications using Jenkins and GitHub Actions, shortening build and release cycles by ~25%.
- Deployed and scaled microservices on AWS using Kubernetes and Docker, reducing service disruptions by ~15%.
- Automated infrastructure workflows and configuration management, enabling reliable, repeatable deployments across environments.

Sr. Analyst

Jan 2024 - Aug 2025 | Bengaluru, India

- Optimized SQL queries against large Mercedes production datasets (MySQL, PostgreSQL) and implemented data-logging metrics to monitor data quality and application behavior, speeding up issue detection and analysis.
- Architected backend services in Java (Spring Boot), exposing REST APIs with JSON payloads, partnering closely with DevOps on deployment and infrastructure needs.
- Enhanced Claims & Returns (Mercedes) functionality using Core Java and MySQL in collaboration with cross-functional teams, driving a ~20% improvement in transaction processing efficiency.
- Led code reviews and authored technical documentation, enforcing best practices and mentoring engineers on TypeScript/JavaScript codebases.

LocalHost

May 2021 - Jul 2021

Data Science Intern

Bengaluru, India

- Trained deep learning models with Keras and deployed them as RESTful APIs using Flask, achieving 92% accuracy in real-time facial analysis.
- Optimized inference pipelines to cut latency by 15%, deploying models within microservices architectures for scalable live environments.

ACADEMIC PROJECTS

Cross-Cultural Diplomatic Assistant

Dec 2025

- Architected a distributed AI assistant on a 2-node Akka Cluster with custom cluster routing and actor communication patterns, achieving 99.9% uptime and fault tolerance.
- Designed a cultural intelligence system using a profit-fear-power framework and 7 IDEA primitives, validated by 160+ tests.

GridDeliveryEnv (Reinforcement Learning & Reward Hacking)

May 2026

- Built a stochastic, partially observable RL GridWorld in Python/NumPy with resource constraints; benchmarked agents across 600+ episodes.
- Engineered a 17-test validation suite and independently reproduced all agent results to floating-point precision.

VOLUNTEERING

Make A Difference

- Volunteer - Taught under-privileged high school students Science and Maths.
- Developed an Augmented Reality and AI based object placement system, which earned the Best Paper Award at the NCCT National Conference on Computing Technology 2022.
